Per-house averages of materials usage, also known as coefficients, for single-family detached homes.

Per-dwelling-unit averages of materials usage, also known as coefficients, for multifamily dwellings such as apartments, duplexes, townhouses and row houses.

An estimate of the total volume or amount of material used in a geographic area. To calculate this data, the Single Family Detached and Multifamily coefficients are multiplied by the estimated housing starts data provided by McGraw Hill Construction Analytics.
